

Thank you for downloading **AR SciFi Effect** Package!

This is a very good science fiction effect used in the AR scene.

The AR scene is taken into consideration in the coordinate and particle system,a more strict setting is made.

There is no dislocation in the position and rotation angle in the AR.

Of course, it can also be used in ordinary games.

It is very simple to use, just to put a prefab“Eft” into the scene,

And then activate the effect through a function on the script:

invoke this function :“Eft”-“Mgr_C”-“St_Mrg” - script” AREftSt_Mgr”- function “Btn”
